

T5 LED Linear Light Fixture — UL/cUL/CE — America/Canada/Europe

Intel Industry’s T5 LED linear light fixtures offer 80 CRI color accuracy in a convenient, integrated fixture form factor. The integrated LED fixture is extremely simple to set up, and does not require any external housing, ballasts, fixtures or power supplies. Simply plug the fixture into any standard power outlet.

Despite its simplicity, the T5 LED linear light fixture can be installed virtually anywhere, ranging from portable or temporary installation using the include mount clips, installation along interior crossbeams, or as a fluorescent lamp replacement in an existing lamp fixture. Multiple fixtures can be daisy-chained up to 25 feet (7.5 meters) using the supplied cables or in a gapless, flush connection.

These fixtures are offered 12 Models 12 configurations, and are bright enough to directly replace T8 fluorescent lamps of equal length.

FEATURES

- Integrated LED light fixture with simple power cord and plug-in installation
- No separate fixture, housing, power supplies, drivers or ballasts needed
- Mount onto virtually any surface using included screws or magnets
- Suitable for Damp Locations
- For indoor use only
- Custom Power cord and Connect wire Available
